

Gradient Descent: Empirical vs Theoretical Linear Convergence Rate

Benchmark A
(Linear Regression)
 $\kappa \approx 1.12, L \approx 1.03$

Benchmark B
(Toy Neural Network)
 $\kappa \approx 3.5\text{--}6.9, L = 10$

Benchmark C
(Rosenbrock)
 $\kappa \approx 2508, L \approx 1002$
