

Q6: Frank--Wolfe Duality Gap and Objective Gap vs. Iteration
(Log-log plots; $O(1/k)$ slope verifies convergence rate)

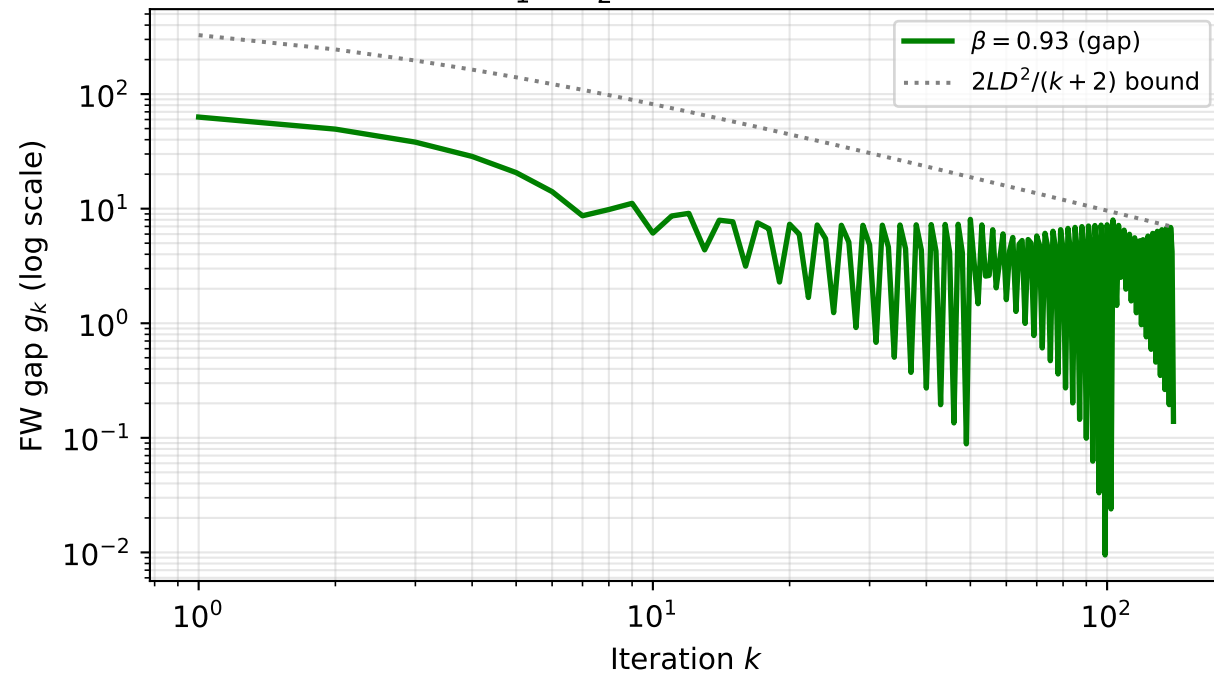

FW Gap: Interior Optimum
 $f(x) = (x_1 - 1)^2 + (x_2 - 5)^2, f^* = 0$

Objective Gap: Interior Optimum

FW Gap: Boundary Optimum
 $f(x) = x_1^2 + x_2^2, f^* = 0.25$ at $(0.5, 0)$

Objective Gap: Boundary Optimum
